

# Fairies In a Jar

By momdot.com

## Ingredients:

Mason Jar(s)

Glitter (diamond glitter works best)

Glow Sticks (variety of colors)

Serrated knife (always get a parents help with using a knife)

Step 1: Decide which color glitter you want in your Fairy Jar and which color glow stick you are going to want in the jar.

Step 2: Cut open the bottom of the glow stick on a towel (so you don't spill fluid everywhere).

Step 3: Dump the contents of the glow stick in the jar. **BE CAREFUL! The inside of glow sticks contains glass.**

Step 4: Dump the glitter into the jar on top of the glow stick contents. The amount of glitter is going to depend on the size of your jar, how sparkly you want it, and what glitter you decide on. If the glass from the glow stick did not break upon dumping it into the jar, you can break it now by hitting it with the end of the knife.

Step 5: You can now put the lid on!! Make sure it is very tight, and shake it up like crazy!
